

WAI YAN MIN LWIN

FRONT-END DEVELOPER

I am 19 years old front-end developer with a sort of solid skill with JavaScript and React.js. I came from non-educational family background. After my first line of code, I realized I was born for this. My problem-solving skill immediately improved as well as programming skills. There is a lot of difficulties for parents who are working class. They couldn't really afford to be supportive to me. But I didn't give up for any reasons. That raised me up to this level and seeking for new challenges in professional fields.
